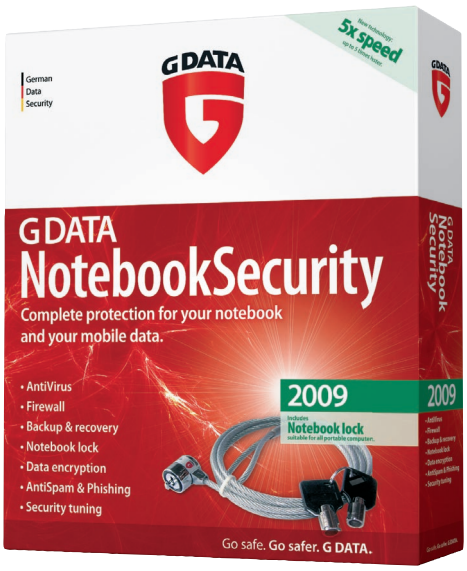
Product Information

G DATA NotebookSecurity 2009

Notebooks need greater protection than desktop PCs because of the increased risk of damage or loss.
G DATA NotebookSecurity offers you a unique software package especially for notebooks. It combines the well-known G DATA InternetSecurity with backup, data encryption and notebook lock for real protection of hardware against theft.



G DATA AntiVirus

- DoubleScan: top award-winning virus detection
- OutbreakShield: immediate protection against new viruses
- Behaviour monitoring: detects active malware in the absence of signatures and heuristics.
- New heuristics detect even more unknown viruses
- Improved protection against viruses, worms, rootkits, spyware, dialers, trojans, backdoors and much more
- Virus blocker for email and instant messaging

G DATA Personal Firewall

- Award-winning protection against attacks
- Very easy to use thanks to new rules
- Four security levels or expert mode
- When gaming: switches automatically to autopilot for invisible firewall protection

NEW: G DATA TopSecret

- Data safe (virtual drive) for encrypting your data
- Crypt-on-the-Fly: En- and decryption in real time
- With five algorithms: MARS, RC6, Rijndael, Serpent, Twofish

NEW: G DATA SecurityLock

- Effective hardware protection for all notebooks with lock slot
- Steel cable with lock for attaching to table legs etc.

G DATA Backup

- Automatic data backups, simple recovery
- Backup to storage media or online (incl. 1 GB storage)

G DATA AntiSpam / AntiPhishing

- Effective protection against spam email and phishing attacks

Additional modules

- Security tuning, parental controls, track eraser, data shredder, banner blocker
- Detection updates every minute, software updates and upgrades are included for 1 year

What's *NEW:*

- Up to 5 times faster, thanks to new DoubleScan technology including Fingerprinting and ParallelScan
- New 'silent' firewall and HTTP scan: Fast surfing without interruption or any delay for the first time
- Old security software automatically uninstalled
- Brand new, fast backup and recovery
- Improved security tuning closes Windows holes
- Data safe for securely encrypting sensitive data
- Notebook lock for securing your notebook
- New intuitive user guidance

System requirements:

- PC with Windows Vista (32/64Bit) or WindowsXP from SP2, 32/64Bit)
- TopSecret encryption for 32-bit systems only
- From 512 MB RAM

For 1 PC 4 018931 029737

For 3 PCs 4 018931 029744
